This is a multi-media CD and contains concert photos of the evening's event which can be read by either Mac® or IBM® based computers using any web-based, browser program

It is required by law (and maybe even by good sense) for us to state somewhere that all of these tunes are copywritten as well as is this specific CD collection, **Hands Across the Sea**®, made from the performances by the various artists who performed on the evening of May 30th, 1998. Take note you pirates. If you do steal it, at least spell all of our names right and be sure to credit who wrote the songs! Better yet, call us and we can set you up as a distributor and you won't have to pay the manufacturing costs-- that reduces your overhead and keeps you legit!. Whadda deal!
